EDUCATION

Manav Rachna International Institute of Research and Studies

Bachelor of Technology in Computer Science Engineering

Faridabad, India

Sep 2022 – Jun 2026

EXPERIENCE

OneCX

Software Development Intern

Gurugram, India

Jul 2026 – Present

- Built production web applications for **Flipkart Foundation**, **Boston Scientific**, **Himalaya China** and internal retail platforms using **Next.js**, **React**, **TypeScript**, and **Tailwind CSS**.
- Integrated **Strapi headless CMS** with server-rendered routes and **Zod**-validated environment config, implemented SEO metadata and **GTM** analytics.

SciTech Industries

Software Development Engineer Intern

Remote

Mar 2026 – June 2026

- Architected an **AWS edge-to-cloud telemetry platform** (**IoT Core**, **Greengrass V2**, **Kinesis**, **Lambda**) monitoring **50+ industrial edge devices** in production.
- Designed an **offline-resilient MQTT ingestion pipeline** with a **5,000-message local buffer**, guaranteeing zero telemetry loss across network disruptions and edge downtime.
- Automated **fleet provisioning** and **OTA deployments** for Raspberry Pi devices via custom Greengrass components, securing credentials with **AWS Secrets Manager** and **least-privilege IAM**.

KPMG India

Academic Trainee

Noida, India

Jun 2025 – Aug 2025

- Developed an **AI-powered business intelligence agent** using **LangChain**, **LangGraph**, and **Generative AI technologies** to retrieve and summarize enterprise data through **natural language queries**.
- Designed **retrieval and reasoning pipelines** that generated **structured responses** from internal datasets, improving accessibility of business information for **non-technical stakeholders**.

PROJECTS

Cascade | [Live](#) | [GitHub](#)

- Built an **AI workflow orchestration platform** with a drag-and-drop DAG canvas, integrating **GPT-4o**, **Claude**, **Gemini**, and **Llama** via OpenRouter alongside ByteDance and ElevenLabs for image, video, and speech generation.
- Architected a **dependency-resolving execution engine** on **Trigger.dev** that runs independent branches concurrently, streams live progress over **WebSocket**, and adds **SHA-256 input-hash caching** plus multi-provider retry/fallback to cut redundant paid API calls.
- Shipped a companion **MCP server**, letting Claude and other LLM clients build, execute, and monitor workflows conversationally through the same engine as the UI.

DeskNotch | [Live](#) | [GitHub](#)

- Reimagined the **MacBook notch for Windows** as an **Electron + Next.js** desktop app that unfolds on hover into live media controls, reminders, a focus timer, a file shelf, and Claude/Codex usage.
- Tapped **native Win32 and SMTC APIs** to react to fullscreen apps, media playback, and mic/camera use in real time, and shipped **self-updating releases** via GitHub with **electron-updater**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion

Backend: Node.js, NestJS, Express.js, REST APIs, LangChain, LangGraph

Databases: MongoDB, PostgreSQL, Firebase

Cloud & Infrastructure: AWS IoT Core, AWS IoT Greengrass V2, AWS Lambda, Kinesis Data Streams, AWS Secrets Manager, Docker

LEADERSHIP & ACHIEVEMENTS

- Club Secretary**, **MRSDC** (Manav Rachna Student Developer Community); organized **10+ technical events**, workshops, and hackathons reaching **60–80 participants** per event.
- Organizer**, **Hack It Up**, an intra-college hackathon focused on software development and innovation.
- 1st Place** – Code Sangam'24 (60+ teams) and Design Blitz. **3rd Place** – Hacked-a-thon (50+ teams) and Innoverse'36.
